OUTDATED MOD

This mod is not known to work with the latest version of Kerbal Space Program. Proceed with caution.

Information

Changelog

Stats

Fancy lights and animations on your Kerbals will make them look like a Christmas tree!

Current parts:

1. **Helmet Lights** for those times when you wanted to take kerbal selfies during nights.

2. **Cupola Helmet** for better angle of view when playing with the Through The Eyes of a Kerbal mod.

3. **Jetpack Light**, when you can't use the helmet headlights.

4. **Omni-Tool**, a fancy replacement of the screwdriver tool (left handed, so use the "H" KIS hotkey).

5. **Holo Goggles**, brings diversity to Kerbals, has a Firespitter color switcher.

6. **"Eyepatch" Holo Visor** (male and female versions, has an EVA Propellant level indicator which uses [Indicator Lights](#) mod for animation, this usability is there for the [Through The Eyes of a Kerbal](#) first person view mod)

7. Other vanity items: **Aviator Sunglasses**, animated **Blinking Mic Headset**, **Academy Hat**, **Hard Hat**, **Cowboy** and **Fedora** hats.
